Product discontinuation

Dear Customer,

This is to inform that ams AG will need to discontinue the production of device “**TDC-TCN1 QFN32 LF T&R** “ (ordering code TDC-TCN1) with immediate effect. It is only possible to produce this device for order quantities of equivalents to 25 wafers (which would be appr. 175.000 pcs). Due to possible yield variances a quantity deviation of +/- 10% has to be accepted.

The replacement device for standard quantities (multiples of 3k pcs in t&r) is **TDC-GP21 QFN32 LF T&R** (product description TDC-GP21, material ID 501910002). **Please note** there are no technical differences between TDC-TCN1 and TDC-GP21.

For any further questions (e.g. definition of an EOL agreement) please feel free to contact me at any time.

We are sorry for any inconvenience this may cause. Our application team will be pleased to support you in evaluating the situation.

Best regards,
ams AG
