Customer Notification (datasheet update)

Dear Customer,

We would like to notify you that ams AG is adding a disclaimer in the product datasheet for the products listed below. The reason being that a full lens re-design and qualification are not economically viable due to low demand.

The full effective FOV cannot be guaranteed due to lens shading effects in the image corners, impacting the usable imaging area, as illustrated in the image below:

Furthermore, please be informed that the Naneye lens shading waiver will no longer be required.
