

Premstaetten, Aug.13, 2018

Customer Notification CN24-2018

Dear Customer,

ams AG is pleased to inform you that a new wafer inking tool has been acquired. This system is a frame inker and will be utilized at the production facility in Premstaetten, Austria.

New Tool Details:

Tool Type: TEL Frame Prober used as an inker
Ink Cartridge: Xandex 7824

Strategy:

All products that were previously inked-out using the Automatic Optical Inspection tool will be transferred to this new inker. With this transfer, the throughput and efficiency of the inking process at ams will significantly increase.

Please refer to product list on page 2 of this notification.

Qualification:

The new inking tool was already qualified within ams AG according to internal rules. The ink dot quality improved whereby these are now uniform and identical.

Furthermore, the transfer to the new inking tool has no impact to the performance of the product. Therefore, no additional product qualification at ams side will be performed.

Change Date:

The utilization of the new inking tool will be effective starting from Sept.01, 2018.

Best regards,

A handwritten signature in black ink, appearing to read 'Herwig Klimesch'.

Herwig Klimesch
ams AG
VP of Quality
