1 Information

Product ID: NanEye Camera modules

Date of request: 15 of May 2018

Category: Cat 1 (Major) □   Cat 2 (Minor) ☑

2 Description of change:

2.1 NanEye2D Supply Chain update

In order to ensure the continuous improvement and the reinforcement the NanEye2D supply chain, ams has transferred the final inspection and packing of the selling NanEye2D SGA (2x2) chips directly to our Subcontractor. This change will assure that the material delivered by ams is 100% inspected at our main subcontractor.

Due to this update in the supply chain, the formally supplied PN 301190010 and PN 301200014 will now be replaced by the respective PN 301190021 (NE2D_CHIP_RGB_SGA CON FT SE) and PN 301200033(NE2D_CHIP_B&W_SGA CON FT SE).

With this update, ams has the clear objective to create a more robust, efficient and quality driven NanEye2D supply chain, supporting all customers’ quality and forecast speciation’s.

Type of change:

□ Material change

□ Process change

□ Method change

☑ Other: New supplier introduction

3 Motivation for change

□ Yield enhancement

☑ Continuous improvement (more robust supply chain)

☑ Quality / reliability

□ Process stability

□ Cost reduction
4 Risk assessment / Evaluation of Impact

4.1 Cost of change
There will be no impact.

4.2 Impact on product pricing
There will be no impact.

4.3 Impact on schedule
There will be no impact.

4.4 Impact on design
There will be no impact.

4.5 Impact on product performance
There will be no impact.

4.6 Impact on yield or process stability
There will be no major impact.

4.7 Impact on supply chain
The supply chain will be updated in order to introduce the new PN.

4.8 Impact on inventory
All material in inventory will go through additional inspection at Focuz before delivery to customer and will be delivered as new part number.

4.9 Impact on tooling and equipment
There will be no impact.

4.10 Impact on reliability/qualification status
There will be no impact.
4.11 Impact on packing & shipment
There will be no impact. Subcontractor will follow ams packing specification document.

4.12 Impact on other customers/existing applications
There will be no impact.

5 Implementation of Change

5.1 Implementation date and schedule
ams will introduce the new PN into the supply chain and expects to be able to deliver the new PNs in CW22.

5.2 Verification strategy
Sample cameras have been inspected and packed at subcontractor according to ams requirements.

5.3 Traceability
The assembly batch ID number in SAP will ensure traceability.

5.4 Marking
Not applicable.

5.5 Documents to be updated
Mechanical drawings of the PN 301190021 and 301200033 will be updated for new part number (internal document).
BOM and SAP flow will be updated to introduce the new PN in the supply chain.
Necessary documentation is prepared by subcontractor (Process flow, control plan, inspection WI, packing specification)

6 Verification of implementation
First production batch will be inspected by ams before delivery to customer to ensure inspection and packing is performed according to ams requirements.

7 Comments
None.

8 Attachments
None.
